

Supplemental Figures

Supplemental Figure 1: Study time periods.

Abbreviation: LoT: Line of Therapy

Supplemental Figure 2: Logistic regression sensitivity analysis of treatment escalation.

(a) Predictors of treatment escalation within or after 6 months (N = 9,724,029).

ACE: Angiotensin Converting Enzyme; CCB: Calcium Channel Blocker

(b) Predictors of treatment escalation to combination therapy within or after 3 months (N = 5,254,610).

ACE: Angiotensin Converting Enzyme; CCB: Calcium Channel Blocker

(c) Predictors of treatment escalation to combination therapy within or after 6 months (N = 5,254,610).

ACE: Angiotensin Converting Enzyme; CCB: Calcium Channel Blocker
